

Satellite Radio belongs to the people that subscribe to it. It is not free to the public and should be left alone. I pay my own hard earned money to listen to it. I am glad that it is not censored and that is the way I want it to stay. If I don't like what I hear on it I will change the channel or cancel my subscription, that's my right not yours to decide for me. I don't need you or any one else deciding what I can listen to on the radio, watch on TV or my computer. Especially when it's my money which is paying for this service. You try to control and censor the local media when they don't agree with you. The people will only put up with so much and then we will remove the joke that is our government and put in lawmakers that are for the American people. We have already seen where individuals other than the political norm, are being elected to office. We are tired of government intrusion in to are home and families. You sit there with your hands out wanting more and more of our tax dollars while you miss manage the money and let jobs leave the country. From what I can see and hear the people are getting sick and tired of censorship. We are going to satellite radio to listen to what we want to hear. Leave Satellite Radio alone if the people don't want it, Satellite radio will not last. It's our decision not yours.
